AI Resume Evaluation Report

Professional Summary

Here is a short professional summary based on the provided resume: Results-driven Database Administrator with expertise in SQL Server and MySQL, skilled in database design, performance tuning, and data security. Proven experience in managing critical business applications and ensuring data integrity. Currently serving as a Database Administrator at DataCore Solutions, driving database optimization and troubleshooting efforts.

Resume Evaluation

Score: 20
Skill Match Percentage: 14%
Matching Skills: SQL Server, Database Design & Modeling, Data Integrity & Security
Short Justification: The resume shows some relevant technical skills, but the experience is more aligned with database administration rather than data science. The candidate lacks key data science skills, making them a less strong fit for the role.
